Summary

Computer Science Engineering student with hands-on experience in Full-Stack Development, workflow automation, and modern web technologies. Built multiple real-world applications using React, Node.js, MongoDB, and TypeScript, including expense management, productivity, and hostel management systems. Experienced in deploying applications and building automation workflows using n8n. Passionate about software engineering, cybersecurity, and continuous learning through practical projects.

Education

University College of Engineering, Kanchipuram	Bachelor of Engineering (B.E.) • 8.06
Computer Science and Engineering	Kanchipuram • 2024-2028

Technical Skills

Frontend: HTML5, CSS3, JavaScript, React.js, Tailwind CSS

Backend: Node.js, Express.js, REST APIs

Database: MongoDB

Programming: Python, Java (Basic)

Tools: Git, GitHub

Deployment: Netlify, Vercel, Render, Railway

Automation: n8n

Experience

Tripmilestone Tours Pvt Lt	Remote
Frontend Development and Digital Marketing Intern	Oct 2025 – Present
- Developed responsive frontend interfaces and supported web development initiatives. - Created digital marketing content including Instagram posts, reels, and campaign analytics. - Built workflow automations using n8n, Google Sheets, Apps Script, WhatsApp, and email reminders.	

Projects

FIRO
- Built a full-stack expense sharing platform with room creation, invite-based joining, and custom expense splitting. - Implemented secure authentication, expense dashboards, and custom expense splitting functionality. - Developed using React, TypeScript, Tailwind CSS, and MongoDB.
NURAOS
- Developed an AI-powered productivity platform combining task management, expense tracking, and activity monitoring. - Integrated AI-powered productivity recommendations and personal analytics dashboards. - Built using React, Node.js, and MongoDB.
HOSTEL OUTING PASS
- Developed a QR-based hostel outing management system to replace manual register tracking. - Implemented QR-based entry/exit logging with timestamp tracking and administrative monitoring. - Built using React, Node.js, and MongoDB.

Certifications

CS205: Building with Artificial Intelligence
Saylor Academy
